MINING, BUSINESS AND STOCKS

TALKS OF UNCLE SAM AND MAY DAY

Former Has Good Ore Values in Upper Drift. Says Griggs.

HAS HIGH VALUES IN GOLD.

May Day to Sink Shaft to 1,000 Foot Level Before Developing Large Ore Bodies.

Some interesting developments may be expected in the Uncle Sam and May Day mines in the next few months, declares Euperintendent C. C. Griggs, who is in the city today to attend the monthly meeting of the board of directors of the Uncle Sam Consolidated Mining company, which was held this afternoon. Mr. Griggs was held this afternoon. Mr. Griggs says that development work at the Uncle Sam mine is proceeding in good shape. In the drift, in the floor of which some fine ore was recently found, Mr. Griggs says work has been advanced 60 feet and that considerable ore is now showing in the face of the drift. As the drift advances further into the hill the ore is rulsing in the face.

such that the management feels much encouraged. An assay shows 65 per cent lend, 30 ounces in silver and the high value of \$10 in gold. This appears to be the capping of the ore

In the drift 190 feet below this, which is being sent in to catch the ore body above, the work is now in a lime for-mation that is believed to be indicative of ore. To reach the ore found in the upper drift, the lower drift will have to be sent considerable distance yet. According to Mr. Griggs it will be from 30 to 60 days before this will be On the May Day property the shaft

On the May Day property the shaft is being sent down to the 1,000-foot level. No very active development work will be done until that point is reached. The shaft is now down 945 feet and it will not be long before something interesting will be heard from this mine, it is said.

While the shaft is taking most of the attention on the property shipping is being done to some extent. This it is understood is doing better than paying expenses. A surplus is being accumulated so that as soon as the shaft reaches the 1,000-foot level, development work will be done with a vim.

BROKERS HAVE FAIR DAY. Stocks on Local Exchange Are Lower

-Little of Interest in Market. Conditions on the local mining ex-change today show but little change with more or less of a tendency to slump. Although a fair volume of business was transacted this morning, there was more of a downward trend than for a rising market. Colorado was then for a rising market. Colorado was off this morning and sold as low as \$3.07%. Bullock was stronger than it has been in some days and East Tintic Development showed a better tone. Prince Consolidated showed a rising market and went up five points.

Sioux Consolidated was the victim of the speculative market with cash sales unsteady. Iron Blossom was unsteady and there was quite a range in prices.

and there was quite a range in prices.

The total number of stocks disposed of during the morning session was \$2,and the amount represented was

\$55,42,50
On the curb market several active members made their appearance. East Tintic Gold King was sold at 1½ cents and was offered at 2 cents. Demijohn was sold for 11 cents and was offered at 12 cents. Tintic Empire sold at the offered price, 6 cents. Eureka Swansea Extension was disposed of at 11½ cents. Extension was disposed of at 111/2 cents TWO DESCRIPTION STREET, ON

MINING CONGRESS OFFICERS. Local Officers Are Appointed in Each

State-Capt. D. MacVichie for Utah.

Denver, Colo., March 8 .- The effectiveness of the American Mining congress is to be greatly increased by plan, as announced by the board of directors, of having local officers and subsidiary organizations in each of the mining centers, where no active associations are now in existence. Heretofore the Congress has been exclusive lefore the Congress has been exclusive-ly maticual in its scope, giving little attention to the local problems that yex the camps individually, but its growing strength in all the mining states, with new a large membership in each has suggested a new arrange-ment under which each state will have its own local branch organization with its own local branch organization, with local officers and committees in chargo. The national organization will thus be brought into close contact with the small operator as well as the large one, and the entire strength of the national body will, if necessary, be thrown behind any local movement for relief from conditions generally oppressive to the industry.

hind any local movement for relief from conditions generally oppressive to the industry.

Besides having a vice president for each state, who will preside over all local meetings, and look after the local affairs of the Mining congress, standing committees will be appointed by the congress for each state, for the purpose of ascertaining how the industry is locally affected by such questions as the forest reserves, smelter rates, transportation rates, labor conditions, and the like.

Capt. Duncan MacVichie has been appointed vice president for Utab.

MONTH OLD CAMP GROWING.

Custer in the Deseret Wilds Has Some

High Grade Ore. Custer is the name of the latest camp in the Inyo. California, mineral fields It is located on the west side of the Argus range, south of Darwin and north and cast of Mojave, and somewhere in the heart of the most dosalate place in the world. Already it is estimated that less persons are at the

into the camp and two restaurants are doing husiness there.
Recently the Keeler-Mojava rings took out a sack of selected high grade are which returned \$106 and some conts, as well over \$1 s pound. On account or the character of the country authentic news from the camp is scarce.

A party of surveyors from Los Angeles has gone to the camp to hay out a townsite and stake out the clains. Some showy specimens have been exhibited in Mojave and it is reported that a large sule has been made and a mill, from further up the range, is being moved to Custer.

LOS ANGELES MEN SECURE AN OPTION

Col. Thomas P. Murray and Others to Develop Deprezin Group.

RICH SHIPMENT AT MAMMOTH.

Small Stringer of Rich Ore in Plutus -Will Probably Levy An Assessment.

(Special to the "News.") Eureka, March 8 .- Since the force at

the Gemini mine was cut down there has been a rumor in circulation that the deal whereby the mine would become a part of the United States company's holdings was about to be closed. It is learned from the local manager that a deal for the sale of the property had been under consideration fo some time. The mine has been inter some time. The mine may been interrupted recently by the power
Service, and not destring to risk operating the entire equipment of the mine
during the uncertain power period, it
was deemed best to suspend development work on the lower levels. Operalions will be resumed shortly at depth,
by which time, possibly, the deal pending for the sale of the mine will have
been settled one way or the other.

ing for the sale of the mine will have been settled one way or the other. Some of the richest ore found in this district has been taken from below the water level in this mine. Col. Thomas P. Murray of Los Ange-les was in Eureka Monday and Tues-day, last, and while here secured an option on a group of claims which will form the basis for the organization of another strong company. The claims another strong company. The claims secured under an option by Mr. Murray and associates are owned by Hugo Deprezin and are situated north of the Yankee Consolidated holdings. They are the East Humbug, Comstock, Knight and Jack Fraction claims, and e chances of this group containing a north extension of the Colorado ore dy are very favorable. This deal has body are very favorable. This deal has been under consideration by Mr, Murray since last summer, when he visited this district and became taken up with its fine prospects. Since that time a sheft has been sunk on one of the claims to a depth of 45 feet. After the formation of the new company has been made, a systematic development campaign will be commenced. The shaft will be timbered and new equipment will be installed.

ARRANGEMENT FOR AIR. The company will try and secure air from the Yankee Consolidated for the from the Yankee Consolidated for the operation of its hoisting plant and machine drills. In the event of not being able to make these arrangements the new company will place an order for a new compressor and other machinery required to give it a modern plant.

"We are not afraid of deep mining." "We are not arraid of deep mining, said Mr. Murray, "in fact we anticipate prospecting the ground to depth unless we are fortunate in getting what we are dooking for nearer the surface. Our company is not being organized for the purpose of selling stock, as we have ample cash already on hand to meet

Further north of the claims secured by Mr. Murray are the holdings of the North Colorado company, a new cor-

North Colorado company, a new corporation spoken of some time ago and which will file articles at an early date. John Roundy, general superintendent of the Knight properties, is behind the North Colorado company.

The machinery for the East Tintic Development company is being hauled out to the property and hurriedly being put into position. The Development company purchased a portion of the machinery from the Tesora company, but the compressor drills and other equipment have been bought new. There is a force now at work excavating for the hoisting plant. A boarding-house will be creeted at the property, and other necessary buildings erected. When these improvements are finished the company will have one of the best plants in that part of the district.

KNIGHT AT TINTIC.

Another sensationally gich carload of ore was sent out by the Mammoth company last week. The car contained about 30 tons and is worth about 379,-900. It went to Irvington, N. J., the Mammoth company hast week. The car contained about 30 tons and is worth about 379,-900. It went to Irvington, N. J., the Mammoth company having no regular smelting contract. The mine is being operated by a good sized force, and the ore that is being mined is piled up for shipment.

up for shipment.

John Bestlemeyer, president of the
Gruth Mining company which was
recently formed, is making preparations to start work on the company's
ground in the eastern part of the dis-

ground in the eastern part of the district.

John Strang, who is looking after the work at the Plutus, says that a small stringer of very nice ore has made its appearance just off from one of the old stopes in the mine, and the lead is being followed in the hope of getting something bigger. Otherwise there has been little change at the Plutus since the consolidation with the Tetro. The Plutus is now working through what was the old workings from the tunnel level of the Tetro, the hoisting plant not being in use because nothing is being done on the levels that are reached by this shaft. It is unredstood that an agreement was made at the time of the consolidation that no assessments would be levied for

MEMBERS SALT LAKE STOCK AND MINING EXCHANGE. Orders promptly executed in all markets three months after the consolidation, and this is no doubt the reason that the company is not crowding development at the present time. Later the company will no doubt levy an assessment, and commence work in earnest through the Tetre shaft.

ORE IS VERY RICH.

ORE IS VERY RICH.

The strike in the north drift of the Iron Bioseom made a few days ago demonstrates that the ore body is continuous as far as it has been carried toward the south. A drift is now being run south to open up the ore a few hundred feet in that direction. The property is shipping about 100 tons daily to the Tintic smelter, the ore being taken from two places in the mine, and a heavier tonnage may be shipped this week. The ore in the Iron Blossom appears to go better in gold than its neighbors. Assays for the last couple of days showed \$14 to \$25 in gold to the ton. The grade of ore now being marketed will go about \$17 in gold, 115 ounces silver and about 40 per cent lead. Everything indicates that the ore body is not only getting richer but larger as it is opened up towards the south.

There is some talk regarding an assessment to be levied by the Beck Tunnel, but nothing has been given out from the company's office of a definite nature. From time to time shipments of ore are being made to the Tintic smelter which ought to more than pay operating expenses, and if shipments are continued it will not be long before the company's indebtedness is wiped away. Development work is still under way on the 1,100 and 300 levels in the new workings of the mine, and the showings here are very encouraging. The ore which the mine is now shipping is by no means a low grade product.

READY IN A MONTH.

Supt. Creighton Says Machinery Will Soon Be in Shape.

rintendent John Cheighton of the Bingham Mines company is in the ity today. He says that it will be at must a month before work at the company's property at Dalton & Lark will e in shape for anything like good pro-

be in phape for anything like good pro-gress. Some ore is at present being taken from the property, but on ac-count of the condition of the machin-ery, this has been delayed.

When Mr. Creighton took charge he found that all the machinery need-ed overhauling and repairing. To put this in shape was necessary before the active plan of development and the taking out of ore could be put into practise.

The pipe line over the hill, which is about a mile in length, has been the suse of considerable trouble, owing to hie fact that it was exposed to the leanants. This will be reproved and placed in the Muscotte tunnel.

CONCENTRATES.

Jesse Knight, president of the Iron Blussem Mining company, declares that not later than April, this property will be added to the dividend list. He ex-pects to begin with an 8 cents a share devidend a month.

devidend a month.

At a depth of 80 feet the shaft on the Wilson. Riley, Hawley and Graser property in Barber canyon, near Chafey, has driven into ore, for the full width of the shaft, which averages \$40 a ton. On the hanging wall are seems of rock which run \$4 a pound in gold. The owners intend to begin shipments at once.

South Eighth West street, were also quarantined in their homes, suffering from smallpox.

Louise Meeks, 25 years old, of 342 west Second South atreet, and Mary Lindroff, 14 years old, of 340 Tenth East street, were later reported as yietims of smallpex.

COST \$30,000 TO

MAKE TENNESSEE "DRY"

New York, March 6.—Dr. Ira Landrith of Nashville, Tenn., and secretary of the Anti-Saloon league of that state, in discussing here how Tennessee went "dry" says that it cost the league \$30,000 to win the fight. "And," he adds, "what Tennessee has done any other state may do. Even New York can easily regulate its liquor prob-lem if it really cared to. It cost us \$30,000 to do this work but it cost the liquor interests millions and they lost."

QUARANTINE TRAINING SCHOOL

Inmate Discovered With Smallpox-Other Cases Today.

The Uintah training school was quar-The Uintah training school was quarantined this morning when it was discovered that William Marshall.12 years old, was suffering with smallpox, Marshall, who is a ward of the juvenile court, was taken to the isolation hospital by Dr. Samuel A. Paul. The building was fumigated and Chief Prohation Officer Brown was quarantined there. There are 29 hoys who are also under quarantine in the school. D. A. Parry of 696 west First South street, and Mrs. Jane Osborn of 660 south Eighth West street, were also quarantined in their homes, suffering from smallpox.

MARKET ACTIVE, **CLOSING FIRM**

New York, March 8 .- The small opening dealings in stocks showed but small changes in prices for the most part, with the gains the more numerous.

Wabash advanced 1 and the preferred
1% on the report of a traffic arrangement with Union Pactife. Missouri Pa-

1½ on the report of a traffic arrangement with Union Pacific, Missouri Pacific, however, lost 1. Union Pacific, and American Ice gained large fractions and Railway Steel Spring declined 1.

Room traders were more active in the Gould stocks than for some time, the purchases of Wabash encouraging buying of other members of the group. Missouri Pacific met support after its opening decline and was marked up 3% above Saturday's closing. Wabash preferred rose over 2 points, crossing 48. Kansas & Texas also advanced 1%. Hocking Coal ¼ and National Lead 1. Prices hardened a fraction in sympathy. St. Louis Southwestern rose 1&. Minneapolis, St. Paul and Sault Saste Marie preferred 1¼ and Texas & Pacific, Bethlehem Steel and International Paper 1. After a period of stagmation, selling orders in Reading carried it 1½ below Saturday, Disorderly liquidation in Railway Steel Spring broke it 3%. Kansas City Southern and American Smelting fell 1 below Saturday, Toledo, St. Louis and Western 1¼ and the list generally a fraction, but railied later. Bonds were irregular.

Trade lapsed into its recent rut after the announcement that no decision would be made by the supreme court in the commodities case. Reading strengthened to 124 and there was also a general hardening elsewhere.

National Lead preferred fell 1½ and Except for a few specialties which were bid up, the general list was nexlected during the afternoon. Cheapeake & Ohio improved 1%, Virginia Carolina Chemical 34 and American Survival Droportions.

Pittsburg C. C. & St. Louis, Westorn Maryland and American Agricultural

citons.
Pittsburg C. C. & St. Louis, Western Maryland and American Agricultural Chemical rose 1, and Interborough Metopolitan preferred 1%.

PRODUCE.

Chicago. March &—Wheaf prices broke sharply here today on profit-taking by leading holders, the May delivery showing the greatest loss, with a decline of 1% compared with the high point of the day. The break followed a firm openios when prices were a shade lower to ½ 2m digher with May at 1.16% to ½ and July at 1.04% to ½. The firmness at the start was due chiefly to a strong market for wheat at Liverpool. In the first few minutes May sold off to 1.15 and July to 1.03% Firm cables, the strength of wheat and wet weather in the combeit caused a strong opening in corn, but prices soon declined on general selfing inspired mainly by the slump in wheat. Prices at the start were ½ to % higher with May at 68% to %. Early in the day May sold off to 58%.

Oats were weak because of liberal sales by several of the more prominent logs. The break in wheat had a depressing effect. Prices at the opening were ½ higher to % lower May being at 55%.

ing effect. Prices at the opening were 1/4 higher to % lower, May being at 55% to 55%.

Later May touched 55%.
Provisions were in active demand by outside traders and the market was strong. A 10c. advance in live hogs had a builtsh effect. Prices at the opening were 2½ to 12%c. higher.

Wheat—Another severe slant becaused immediately after the publication of the report on farm reserves which showed a much larger amount of wheat still in farmers hands than had been generally expected. May dropped from 1.15% to 1.14%, with only one or two intervening trades. July soid off to 1.62%. Some recovery was made on profit-taking, but the close was weak, with May off 1% 92 to 2% 92% at 1.14 to 1.14%, July closed %c. lower at 1.02% 1.03.
Corn—The government report was also bearish on the reserves of corn and the market became very weak in the final is minutes of the day. May dropped to 51% and July to 57. The close was weak, with May off 1% 92 closed 461%.
Close—Wheat, May, 1.14 to 1.14%; July, 1.02% 91.03; Sept., 97; Dec. 98.
